An Open Invitation to ISCAS 2023 in Monterey, California

IEEE

ISCAS 2023
IEEE International Symposium on Circuits and Systems
May 21-25, 2023 || Monterey, California

Jan M. Rabaey
University of California
at Berkeley

Boris Murmann
Stanford University

In name of the organizing committee, it is our honor and pleasure as general chairs to invite you to participate in the 56th edition of the IEEE International Symposium on Circuits and Systems (IEEE ISCAS 2023). Since its conception in 1968 and building upon more than fifty years of history and sustained reputation, ISCAS is the premiere forum for researchers in the active fields of theory, design and implementation of circuits and systems. This is accomplished through thought-provoking keynotes, a broad range of special, technical conference, poster, and live demonstration sessions, and publication of conference papers. ISCAS 2023 has chosen "*Technology Disruption and Society*" as its overall theme, aiming to emphasize the potential of the CAS Society to find innovative solutions to challenges facing society today. With technology ever more interwoven into the daily fabrics of our lives and the environment around us, the impact of technology disruption is getting more and more profound. ISCAS gives the technical community the opportunity to reflect on how itself could help to address some of these challenges through creative solutions. The proximity of the Bay Area and the Silicon Valley, which have been at the core of technology innovation and disruption over so many decades, make this theme even more relevant.

After a 25 year absence, Monterey has again been chosen as the perfect place to house ISCAS. Picture seaside cliffs and pristine beaches, where you might spot whales, sea otters and migrating birds. From famous writers' haunts to Spanish Missions, the history here is just as fascinating as the geography. Aside from the epic scenery, you'll savor unforgettable flavors from the area's award- winning food and wine scene. Plus, there are limitless opportunities for recreation, including world- class golf, shopping, kayaking, hiking and only 70 miles from Silicon Valley.
